ABSTRACT

Based on the growing importance of *place*-based strategic intelligence, this article puts forward a conceptual framework for a new methodological approach to influence the shaping of subnational economic development. The novel Opportunity Areas Analysis Tool has been designed and deployed in the context of a City Region Deal in Scotland, UK. We define key trends, map core capabilities and assess exploitation capacities for data-driven innovation economic opportunities. We critically appraise the effectiveness of this approach for the creation of inclusive place-based future visions and narratives, and the alignment of technological opportunities within diverse geographical (e.g., semi-rural and rural) and sectoral conditions.

공동 제작은 복잡하고 불확실한 사회 문제를 해결하기 위해 다양한 형태의 도시 전문 지식을 결합하는 수단으로 점점 더 수용되고 있습니다. 기존의 도시-지역 정보 프로세스는 특정 형태의 전문 지식을 다른 것보다 우선시하는 인식론적 단일 문화에 의존합니다. 공동 제작은 무엇과 누구의 지식이 중요한지에 대한 질문을 통해 도시-지역 정보의 지배적인 개념화에 도전합니다. 우리는 도시-지역 정보의 공동 생산이 중재 전략과 불안전 전술로 구성된 정치적 인식론적 실천이라고 제안합니다. 우리는 케이프 타운(남아프리카 공화국)과 그레이터 맨체스터(영국)에서 근무한 경험을 바탕으로 다양한 전략과 전술이 도시-지역 정보의 개념을 열 수 있는 방법에 대해 비판적으로 반영합니다.

Reflecting on 40 years of Maritime Policy & Management

through that emergent phase before handing over to the incorrigible Professor James McConville at the City of London Polytechnic. Both had a keen interest in seafarers and published widely on rights and labour economics, respectively. Professor Patrick Alderton, who took up a Chair at the World Maritime University in Malmö, and Professor Trevor Heaver of the University of British Columbia, have written extensively on ports and ship operations and have a continuing association with the Journal as reviewers and contributors.

The journal *Maritime Policy & Management* (MPM), the flagship journal of international shipping and port research, now has well over 500 international reviewers, publishes seven issues a year and is read by thousands of academics, maritime practitioners, government officials and journalists around the world through online subscriptions. Last year, we obtained our first impact factor (0.743) in the Transportation category of SSCI, which has led to a dramatic increase in submissions.

It would be remiss of me if I did not use this issue to express my sincere thanks to everyone involved in the journal's long history and continued success—authors, reviewers, administrators, editors and editorial board members. We are also grateful for the administrative support from a number of universities, and particularly to Chung Ang University, where the journal currently resides with my co-editor, Professor Kevin Li. Finally, a sincere thank you to our publishers, Taylor and Francis, for their professionalism and encouragement over the last 40 years.
